

[5 Different Spyware , Adware, And Virus Free Cool ScreenSavers Crack](#)

The screenshot shows the SpyHunter 4 Malware Security Suite interface. The window title is "SpyHunter 4 - Malware Security Suite". The interface includes a sidebar with navigation options: Malware Scan (with sub-options: Start New Scan, Scan Results, Custom Scan, Disabled Programs, Backup, Exclusions), DNS Settings, System Guards, Spyware HelpDesk, and Settings. A "Register Now!" button is highlighted in yellow. The main area displays "Scan Results" with a message: "SpyHunter has finished scanning your computer. To remove all detected threats, just click the 'Fix Threats' button below. Alternatively, you can manually disable individual threats by clicking the checkboxes in the sections below." A large green "Fix Threats" button is visible. Below this, a red warning box indicates "Threats: 383" and lists harmful malware objects. The first entry is "Conduit Search/Toolbar (150 infections)", which hijacks the browser and uses aggressive marketing. A list of files associated with this threat is shown, including cltmng.exe, CltMngSvc.exe, cltmngui.exe, SearchProtect, DisplayName, DisplayIcon, DisplayVersion, and Publisher. A "Select All" checkbox is checked. At the bottom, a green bar shows "Safe Components: 621". The bottom left corner displays version information: DB Version: 2014.04.01v01, Product Version: 4.17.6.4336, and Protecting Against: 1061541.
