Canada sent the TESS into orbit as part of a nine-month science mission to collect samples from various locations in the solar system, including Europa, Titan, Ganymede, Io, Enceladus and Callisto.

How Adobe Illustrator CC has been getting an overhaul in recent months. I spent today getting Photoshop CC 11.0 to Cracked free download and now I've released some new Photoshop CC features and how-tos as well as Photoshop CC 2017:.. A video of the transiting passage and mission highlights the Canada Space Agency's journey from space to Earth. It concludes with a video by Canadian astronaut Mike Hopkins. 1:19.. TESS will also return in two more flybys of the moon from November and December.. Scientists at the agency plan to collect a variety of data about Europa's environment from a small flyby of the moon next year to determine the composition of its ice shell. They've also studied the potential impact from Titan, the sixth largest moon of our solar system that may have water vapor stored on its surface.. The space agency says Hopkins — the first Canadian astronaut to be stationed in space since the space shuttle's retirement in 2011 — will now move aboard the Kourou French-flagged satellite. Hopkins completed his final spacewalk in September.
