## About This Game

### About This Game

The year 2027 brought hope to a world on the brink of environmental and political collapse. On the last leg of its funding, NATO's United Space Mission (USM) made a discovery on the moon that changed the course of human history. A large alloyed sphere, found nestled in a crater under the lunar dawn, is revealed to be an alien artifact containing a message for mankind. As an international team slowly deciphered the artifact, the content of this message began catalyzing a huge leap forward in our sciences. Humanity was abruptly catapulted into a new interstellar age. There are those who now believe we were not ready.

### FreeFall Tournament - a space marines themed TPS (third person shooter)

Intense, fast-paced, team combat. Animation and camera control that make you feel like a space marine...super human. Have it all: jetpacks, armor, hammers, swords, guns, bombs, in melee, ranged, and aerial combat. Tanks smashing with hammers, deadly

Scouts slashing their enemies down the middle with their katana, different jetpacks for every class create dynamic aerial combat, Gunners sniping from across the map, and Tech healing and dueling while laying down turrets. Even throw f-bombs!

All class specific jetpacks allow you to hop and bound across the map gaining momentum and speed.

Your team's combined skill and coordination determine the winner of this tournament. Choose to fight as one of a growing cast of classes battling in 10-20 minute matches. Please try it out, it is not like other shooters.

### Key Features

---

10 classes: Gunner, Tank, Tech, Scout, Blazer, Blaster, Shocker, Assassin, Commando and Bomber  
Class skins include multiple looks and models  
Each class has 2 weapons, 2 abilities, 1 bomb type - all are unique. Some has additional R ability  
Maps: Training Arena, Shuttle Bay, Moon Base, Space Station  
Game modes: Team Death Match, Control Point Scramble, King of the Hill, Payload  
Ranks up to Marshal  
Hop with jetpack thrusts to bound across maps or Slide to take advantage of forward momentum  
Target-locking enables aerial combat and fast game play  
Respawn system regroups fallen teammates and balance matches dynamically  
Also engage slide mode to evade fire or rapidly close in on an escaping enemy

### **Game Play**

Two teams, Blue and Gold, compete to win matches. XP and Z Cash (the in-game currency) are given as rewards for players who complete matches. If your team wins you get more than if you lose. Players can start or quit a match at any time, but need to be present to the end in order to get rewards. Rewards are not given for individual kills.  
The majority of perspective is from the 3rd person over the shoulder point of view. Cameras move in during melee combat or switch to scoped FPS view as needed to add fluid realism to game play.

### **Monetization**

This game has a monetization system similar to League of Legends, that avoids being pay 2 win. Of the 8 classes, 2 are unlocked for free each day, and they rotate on every 1 week. You can switch back and forth among the free classes during a match. Classes are purchasable for permanent use with both in-game currency and real money. Upgrades that give small performance boosts (like "runes") are purchasable with in-game currency only. Cosmetic skins for the classes are available to purchase with real money, but do not give any benefit to the player other than looking cool and different. In-game currency and XP boosts are available to shorten the grind, but not eliminate it - hey, it's fun and we want you to play a lot of it!

### **Design Principles**

Fun is more important than realism  
Piloting futuristic battle suits should make the player feel super-human  
Each class should have combat advantages and disadvantages, but not be a hard counter to another class  
Every map should have features to showcase advantages of each class  
One-Shotting should be very rare in normal 1v1 confrontation  
Players with good tactical awareness should have opportunities to contribute to their team without requiring lightning reflexes  
Conflicts should generally be won by the team that brings more troops to bear at the locus of contention. However, very skilled/lucky/tactical players should also have opportunities for 'heroic actions' that turn the tide  
Players level up mainly through teamwork, not individual performance

### **Technical**

Engine: Unity 3D  
System requirements: minimal, 2 button mouse, ethernet connection  
Initial download: ~10MB  
Full download: ~70MB

### **Key Bindings (internationally localized)**

With a little polish, this could be a fun arena shooter. Sadly, its very rough around the edges and tough to recommend.. before we get into this like many other reviews i have been playing this when it was a browser game when i was around 10-12 when making accounts was free and then another company bought the rights to the game and i lost all my progress i got like 4-5 skins then lost it coz of the stupid verification steps and 12 year old me did not understand it and gave up it was fun while it lasted, anyway i bought on steam and i was like this should be a good one, i was correct it was a good game but i wasn't having as much fun as i thought i would have so i refunded but if you're like 10 or so and dont like fortnite but want some cartoon type FPS game like 12 year old me then this game is perfect 10V10  
if you're a teen and like real FPS better off getting a gaming PC and getting Battlefield and COD.. Review Update: I changed the review because of the fact that the developers have literally done nothing with this game for the past few months.

My Last Review: One of the most addicting games on Steam. Period. This game is literally so much fun, and the mechs/heroes can sometimes remind you of the upcoming game, Anthem. Sure the game has a lot of bugs that need fixing. But the game is still really fun and worth those 5 dollars. Just try it.. Refunding it is the best part about this game.. Refunding it is the best part about this game.. If you are a new player and aren't prepared to shell out money to be on par with players that have been around for a long amount of time, this game is not for you.

If you are returning from another site, such as y8 or Kongregate, you won't be able to transfer your account progress, so read the above excerpt.. This game is a F2P browser game (still is) which has been converted from Unity to WebGL due to a certain plugin being unsupported anymore. The reasoning behind the payment for this steam version is the increase in performance than what you would have in a browser. Plus it keeps the servers up.

The game is extremely fun to play once you master the games gravity mechanic as well as your average classes that can be compared to TF2 and other types of games. Ever wanted to be a medic and engineer at once? Pyro with wall hacks? Weild the power of Heavy's chaingun and Soldier's rocketlauncher? Then look no further.

With only 4 maps to play on and 10 classes to choose from i do find the content to be lacking especially the grind required to buy classes.

---

You do start off with your basic rifle gunner man but there is also a rotation of 2 other classes to use from for 6 days or so days. However it takes 80 matches for a few of the classes or 120 for some others (or so if you can win 80-120 times in a row) to unlock them.

But hey who knows this all might change in the future.

Overall it's a good game i have been enjoying it pre WebGL and it is almost exactly the same as it once was.. it sucks... i want a refund

Still Trash. Great game but y8 account transfer should be a thing. This game is I bought it expecting a high octane, high mobility arena shooter, only to get this Everything moves like chalk on sandpaper, most heroes cost 8000 points, you get 30 per win, and the only people that play on US servers are like, mexican kids that stand still doing nothing. Buy it if you hate yourself. With a little polish, this could be a fun arena shooter. Sadly, its very rough around the edges and tough to recommend.. Still Trash. I have been playing this game since I was 15 which is like 2 or 3 years ago. Think Freefall Tournament as a Team Fortress game set in a Sci-Fi world. All classes are all balanced. You can upgrade each classes armour to gain an advantage over the other player in speed, targeting, crit dmg, etc.

What is your favorite gamemode and map

My Favorite gamemode is Payload and its map is Spacestation.

I recommend the map and gamemode for snipers or if you want to run and get kills.

All classes have jetpacks and 3 differint unique abilties. When you fall, you can go underneath the map. You can also ski which may feel similar to the tribes ascend game.

How to Strafe in Freefall Tournament

1st you press W to run

2nd you press shift key to ski

3rd press space bar to jump (don't hold the spacebar or your going to be using your jet pack.

one more thing, all weapons have unlimited ammo, the only items you need to pick up are HP, Quad Dmg and bombs.

See you [player name] in freefall tournament. Dont forget that this was a browser game created in 2012, it can be much better in the future with this steam port. Gameplay is smooth and very fun. Dont be fooled by my played hours, i have played it for 6 years on browser. Its different than other shooters and deserves a go atleast. You will find it quite fun..
