[it's possible] is a really great rage game, with some pretty decent controls. It takes a minute to get used to, and can get very frustrating from time to time, but I'm pretty sure that's intended.

I got a solid hour out of it before I moved on to wanting to create custom levels, which is part of the steam version of the game, and it seems pretty straight forward.

It's only 2\$. Why wouldn't you buy it with all of these positive reviews?
I mean, come on. You know it's possible.
