About This Game

You find the mechs destroyed in the great war. Your task is to restore them.

Inside your own workshop check damage to lasers, miniguns, actuators and other parts.
Remove the damaged parts and insert new ones.

Modify existing mechs by changing their parts. Add new gun, change the body etc.

Start from a small workshop, buy new tools, do more expensive repairs, earn more and upgrade workshop.

After the repair, check if the mech is ready to fight.

Bobble - "WOW! This is one of the ancient combat Mechs! It will be a great asset for our Clan ... if You can make it work"

New mechanics in town!:

A huge announcement to all of you mech fans out there! We, the Polyslash team, are now the owners of the “Mech Mechanic Simulator”!

Yesterday we started preparing to resume production of the title in our studio, and as soon as next week we will start working on it full force! We know that many of you are awaiting new information, and we promise to do everything we can to show you a few of our ideas very soon.

So sit down, relax, and await more details!
