Okay... Let's just stop and look at a couple of things:

1) The "professional programmers" can't be bothered to use correct English grammar in the two sentence quick description of this game and say "Develop by professional programmers."

Question: If the "professional programmers" can't even spell a word like 'developed' correctly here on the Steam store page, why should a potential customer trust that this game called "Trash Defense" is anything but the first word of the game name?

2) The developer and publisher name is "Fugging games" (except it's actually the F bomb, as in replace "gg" with "ck")

Question: Let's imagine for a moment that Pepsi had named their company instead "Poopsi" and called their soft drink "Trash" much like the developers name and game name here. Do you think it would have sold initially and ever gone on to have the success that it has?

This game is discussed in entirely too much detail and this game is played entirely too long in this first impressions review video:

<https://www.youtube.com/watch?v=57h8UQ5yTKU&feature=youtu.be>

NOT RECOMMENDED as my fugging gut instinct tells me that this "Fugging" developer is just an alternate developer name and well known asset flipper already here on Steam just hiding behind an alternate developer account name. Not only that, this game is the first word of its own title name, and there is no way that can be defended. My score is a big whopping red ZERO. Throw your coins in the trash instead of putting them towards this trash as that would be money better spent.. Okay... Let's just stop and look at a couple of things:

Not the deepest of titles, and I have struck a problem (not a gamebreaker) where one of the lanes could not be fully viewed, but more than enough to keep you occupied.

Unlike Xator99, I have more to worry about than the spelling ability of every Asian (?) developer (my Chinese spelling ability is non-existent) and their tendency for picking "unusual" Western names. Suspect Xator99 might have been getting over a bad Chinese meal!. Okay... Let's just stop and look at a couple of things:
