This is a lovely game with bite sized levels and nice, clean pixel art. Very enjoyable!. A fun and attractive little platformer. Offers lots of variety in it's challenges, no single obstacle or trap type is overused; each level provides something inventive and new.

A well built game, although I did encounter the odd stutter or frame-drop occasionally which is a bit questionable in a sprite-based 2d platformer (which shouldn't require much processing power) and can be off-putting when you're trying to make precision jumps during a time trial.

Good value for the price tag.

Completed 100% in 3.7 hours. Great game!. What a treat!

I love the bite-sized challenges and superb level design. It's amazing how much variety you can pack into such a simple premise. Great stuff!. Super Dangerous Dungeons is a very enjoyable game with tight controls, nice levels, nice sprite work, and a soundtrack that sounds dead-on like an old game called Ardy Lightfoot by ASCII and Titus France. Definitely hit the nostalgia button for me, and I also really enjoy that it has achievements for both regular gameplay and the Time Trial mode, which adds a lot in terms of replayability.

I'd still recommend catching it on sale if possible as it's kind of on the short side, but I will probably be picking up other games by Adventure Islands in the future, because this title feels pretty solid and my guess is that their other games in the future will be too, even if they sort of follow the same formula.. Fun and simple this is a great entry for the retro platformer style lovers, that doesn't demands a lot of challenge, but still is a really good game

Really excellently made, simple, and efficiently designed game at a fair and accountable difficulty level. Very good for its price, breaks little new ground.. Great game :) Had already played the original, and was very happy to play this one as well. It's awesome playing this kind of games that remind you of your younger times :) Looking forward to play new games from you!!

P.S.: I got the four crystals before the fourth boss, and entered the big door as soon as I got to it. In the end he was only holding three treasures, so I got back to the big door, passed through it, but exiting by the right side brings me back to the level menu. Is it a bug or you can't have the fourth treasure after getting all crystals? Thanks in advance! ;). Great fun little Inide retro platformer Gem - which is one of my favourite genres. I am only just over one hour into the game but so far am really enjoying the quality of the art and the fun gameplay mechanic. Player movement feels solid and the level design is well thoughtout and follows a consistent theme. I am glad I discovered this game. I have numerous indie retro platform games in my collection, and I rarely commit to fully finishing the games, but this is on my list to do so. Congraulations to the developers. I look forward to their future releases.. very great game! , nice and simple. Great fun little Inide retro platformer Gem - which is one of my favourite genres. Simple platformer with a nice difficulty increase as you go farther into the game and hidden paths that you will miss if you are not paying attention. Free updates on extending the game is also a plus. I think i may have found a bug in the game? On the ice dungeon im on the 2nd to last level and somehow somehow I can play the levels that I have not officially gotten to yet. Normally you can't play a level until you beat the level before it. Im not sure if thats a bug but I find it kind of weird.
