About This Software

Chameleon Media Player is non-profit utility software that helps multitaskers reclaim their computer screen space and increase productivity. Windows and Mac users can play video files or stream with their favorite services fullscreen, transparently atop their desktop with full control of the apps beneath. Ideal for gaming on Steam while watching Twitch TV, or simultaneously binging your favorite movies and TV shows while you play.

Chameleon Player loads video files (mkv, mov, mp4, avi) or one of several supported streaming sites, (YouTube, Twitch TV, HBO GO, ABC, NBC, TBS, TNT, ESPN and others*) and displays playback in a fullscreen window over your desktop. By making this window semi-opaque and controllably transparent, your desktop is visible and fully interactable beneath. Since Chameleon is a tray application, all mouse and keyboard events can be passed on to all background programs or Steam games on your computer while playing your favorite videos, youtube videos or streaming shows in the foreground.

I created the software for myself initially and found it to be such a useful tool that I wanted to share it with others. It's completely changed the way I work -- I've fit an extra Coursera course into my monthly routine and was able to catch up on the latest season of Rick and Morty with little drop in my work productivity. I also play games on Steam (of course) and being able to watch Twitch and YouTube in the background while gaming is just awesome. I would often mute these games and listen to WNYC or other educational podcasts, but opening this up to videos as well changes everything.

Give the free demo of Chameleon a try and see what I mean! All proceeds help our non-profit, Cinq-Mars Media, to continue its mission of educational research and technology. Originally devised as an educational tool to help busybodies absorb online classes while multitasking and practice learned concepts while watching lectures, Chameleon can also function as an entertainment app.

** Cinq-Mars Media does not endorse or provide any of the aforementioned streaming services. These may require paid subscriptions and are not included in the purchase of Chameleon Video Player.

* Widevine is a DRM plugin some popular streaming services like Netflix and Hulu use, and while Google offers a path for companies to license the plugin, repeated attempts to reach out have gone ignored. Certified letters, phone calls, emails, you name it, but rest assured we haven't given up as all the code is already baked in, awaiting certification from Widevine.

Title: Chameleon Video Player
Genre: Education, Software Training, Utilities
Developer:
Christopher Cinq-Mars Jarvis
Publisher:
Cinq-Mars Media
Release Date: 5 Apr, 2018

7ad7b8b382

Minimum:

OS: Windows 7

Processor: 1 gigahertz (GHz) or faster 32-bit (x86) or 64-bit (x64) processor

Memory: 500 MB RAM

Storage: 100 MB available space

English

nytimes.com

Follow the lives of 2,520 kids who grew up in rich families ... and see where they end up as adults:

Category	Black men (%)	White men (%)
Grew up rich	15%	36%
Rich adult	20%	23%
Upper-middle-class adult	24%	16%
Middle-class adult	24%	10%
Lower-middle-class adult	23%	8%
Poor adult		

Most white boys raised in wealthy families will stay rich or upper middle class as adults, but black boys raised in similarly rich households will not.

Black Boys Who Grow Up Rich Often Become Poor

Ideal for watching youtube or movies while doing some boring stuff at the same time.. disappointing . . .

Looks good at first but lacks:

video codec support

subtitles support

common playlist files support. disappointing . . .

Looks good at first but lacks:

video codec support

subtitles support

common playlist files support. I was imagining sort of software which provide to watch something during coding. And I realised that someone already imagined it and made it real. I really like this software.. disappointing . . .

Looks good at first but lacks:

video codec support

subtitles support

common playlist files support. Doesn't work on Windows 7 64bit.

I've tried multiple shortcuts (CTRL+SHIFT+T, SHIFT+CTRL+T), the program doesn't work after you select the video or service you want to stream.

There's no manual, only an useless webpage with a single (and wrong) shortcut.

Even giving admin privileges to the application doesn't work.

A good idea, but badly executed.. Chameleon Media Player is non-profit utility software that helps multitaskers reclaim their computer screen space and increase productivity. Windows and Mac users can play video files or stream with their favorite services fullscreen, transparently atop their desktop with full control of the apps beneath. Ideal for gaming on Steam while watching Twitch TV, or simultaneously binging your favorite movies and TV shows while you play.

Since Chameleon is a tray application, all mouse and keyboard events can be passed on to all background programs or Steam games on your computer while playing your favorite videos, youtube videos or streaming shows in the foreground.. I am a website developer by day and a gamer by night. I also travel a lot and have to use a one monitor setup on the road. Chameleon Video Player allows me to code websites while watching movies and news through my other applications. Very Cool! Anyone who likes to work or game while watching streaming TV, Twitch or local movies on a single monitor should get this!
