I'm in doubt whether it's possible to specify a class conditionally in C#. Suppose that a project is under.NET framework 1.1 and the class is from.NET 3.5 framework. A) Is there any work-around to avoid recompilation for a file including the third-party.dll? B) Does Visual Studio support a feature to specify a warning message and error? Thanks in advance, Mat A: From MSDN: Visual C# Code Analysis is the tool for checking compiler warnings and errors that appear in your source code, and it can also help you locate runtime issues, missing code security issues, duplicate methods, and issues in your third-party assemblies. Their product name is Code Analysis. It's available in Visual Studio 2005/2008/2010 and NET Framework 3.5. Cancellation Policy (a) We are committed to making sure
